1. Introduction: -

LIRS stands for Lagos State Internal Revenue Service, which is the agency responsible for collecting taxes on behalf of the Lagos State Government in Nigeria. LIRS consumption tax is a type of tax that is levied on goods and services purchased in hotels, restaurants, bars, event centres, and related facilities in Lagos State.

To improve tax collection efficiency, LIRS has proposed a solution to digitize transactions initiated from customer outlets and integrate the platform with existing point-of-sale devices using APIs. This self-service platform enables businesses to easily calculate and remit their consumption taxes to the government. The main goal of this solution is to simplify the tax payment process and increase compliance by reducing the burden on businesses.

- **Purpose of EFS Integration:** - By integrating your Sales / Accounting system with the OTS, you gain real-time visibility into your tax obligations, making it easier to track and manage your tax liabilities. The integration streamlines your tax reporting process, enhances accuracy, and ensures compliance with LIRS, ultimately saving you valuable time and resources.

Overall, integrating your Sales / Accounting system with the OTS provides a seamless and automated solution for tax management, enabling you to focus on running your business while ensuring efficient and accurate tax calculations and reporting.

- **Purpose of the User Manual:** - This document serves as a comprehensive guide for Collecting Agents responsible for monitoring tax collections, invoice synchronization status, and EFS status. Efficient monitoring is crucial for ensuring compliance and accuracy in tax collection processes.

2. Getting Started: - Efficient monitoring of tax collections, invoice synchronization, and EFS status is imperative for Collecting Agents to fulfil their responsibilities accurately and maintain compliance. Regular reports, cross-verification, and timely submission play crucial roles in ensuring that tax-related processes run smoothly.

By adhering to the guidelines outlined in this document, Collecting Agents can contribute to a streamlined and transparent tax collection process, reducing errors and ensuring adherence to tax regulations.

- **What we need to integrate with 3rd party sales/account system:** -
 - I. OTS Agent login credential
 - II. API Base Url
 - III. API key
 - IV. API Secret
 - V. Company ID
 - VI. Default Revenue Code
- **How to get these details:** -
 - I. OTS login credential: You'll get an email with "USER ID" & "PASSWORD" when you registered into OTS, Or you can contact LIRS Support.
 - II. For API Base Url, API key, API Secret, Company ID please contact Respective Support to get these details.
 - III. Default Revenue Code : For Revenue Code use "4010041" or please contact LIRS.

3. Integration Process: - The integration process involves connecting EFS with collecting agent's financial and accounting systems, allowing for the seamless transfer of tax-related data and documents for electronic submission. This integration streamlines the tax filing process, minimizes manual data entry, and enhances accuracy and compliance.

- **Download & Install EFS:** -

The following are the steps for installing EFS for agents/ merchants. You can install the EFS server on any platform (Windows, Linux, Mac).

 - I. Download the EFS executable from LIRS official website - (Ex. <https://horc.lirs.net/efs/efs-server-1-10-23.zip>)
 - II. Install EFS by double-clicking on the installer (like "efs.exe" for Windows)
 - III. Accept installation location, terms & condition
 - IV. Click on finish button to Complete the installation.
- **Setting on EFS for 3rd party integration:** -
 - I. Open EFS from desktop
 - II. Enter the user id & password provided by LIRS for the first-time login.
 - III. select "Production." Then click on the Login button.

Do you want to connect with sandbox or production
Please wait while we setup your system

3. Use sandbox
or Production
according to
Requirement

Welcome to **LIRS**
